

MX Logic® Message Archiving Overview

Up to 70% of business-critical information may be in an organization's corporate messaging system.

THE ENTERPRISE STORAGE
GROUP, 2004

KEY BENEFITS

- Minimize the cost and risk associated with non-compliance, loss of proprietary information and inappropriate employee emails
- Simplify email surveillance and archiving with a scalable, easy-to-use managed service solution
- Boost your bottom line with an affordable alternative to in-house solutions that can drive up labor and IT costs related to compliance and email management

Manage email or it manages you – especially if the content contains unpleasant surprises. To protect your business, you need a simple method for storing and retrieving the emails going in and out of your organization, and you need to know the content they carry. Otherwise, you may go down the path of costly audits, lawsuits and governmental investigations.

With MX Logic Message Archiving, powered by MessageWatcher®, you gain electronic oversight to help you manage your entire email environment. And minimize the cost and risk associated with non-compliance, loss of proprietary information and inappropriate employee emails.

POWERFUL SOLUTIONS DESIGNED TO MEET YOUR NEEDS

MX Logic Message Archiving is available in two packages to meet the unique requirements of your business. **MX Logic® Archive Compliance Control** is a complete solution that includes advanced storage, retrieval and surveillance features that work together within a convenient, scalable, affordable managed service. **MX Logic® Archive Storage Control** is available for businesses that require a storage-only solution.

ELIMINATE BLIND SPOTS WITH ARCHIVE COMPLIANCE CONTROL

MX Logic Archive Compliance Control automatically stores inbound, outbound and internal emails. And rapid volume increases? No problem. The solution helps you:

- Comply with electronic security regulations, including those of the Sarbanes-Oxley Act, the Gramm-Leach-Bliley Act, HIPAA, the Securities and Exchange Commission and the Federal Rules of Civil Procedure (FRCP)
- Reduce the financial implications of non-compliance
- Decrease storage and e-discovery costs

This easy-to-manage solution includes enterprise-strength capabilities:

- One gigabyte of storage per user, per year, with an increase of one gigabyte per user, for each additional year of service
- Advanced search options and fast, accurate information retrieval by authorized persons
- Multiple levels of permissions/authority for employers, compliance officers, corporate officers and legal departments
- Default and custom compliance detection capabilities
- Definable retention policies based on regulatory requirements
- Compliance alert notifications to enable further inspection and disposition of messages
- Single Instance Storage minimizes storage requirements
- Real-time data as opposed to point-in-time backups
- Storage capabilities for comments and notes

REDUCE YOUR EXPOSURE WITH MESSAGE ARCHIVING

LAWSUITS OR FINES RELATED TO:

- Illegal activity
- Regulatory violations
- Sexual harassment
- Discrimination
- Workplace violence

THEFT OR LOSS OF:

- Intellectual property
- Customer, client and patient data
- Research and development information
- Financial records

- Flexible options for creating ad hoc reports
- Audit trails provide comprehensive activity logs
- Includes two MX Logic® Archive Surveillance users

MX Logic® Archive Compliance Control also includes MX Logic Archive Surveillance, which works around the clock, scanning external and internal email, and attachments. It pinpoints sensitive or inappropriate content to help you support regulatory and workplace compliance best practices:

- Enforce corporate email policies and regulations that apply to electronic communications
- Prevent theft or loss of intellectual property and proprietary information
- Decrease the liabilities and risks caused by the distribution of inappropriate content

The powerful functionality of MX Logic Archive Surveillance allows you to use pre-established policies and rule sets and take many actions, including:

- Flagged message notifications triggered by policy violations
- Recognize words that are phonetically similar to keywords
- Define exclusions based on To, From, Subject or Content fields
- Review content based on group, user, direction or keywords

CONVENIENT EMAIL RETENTION AND RETRIEVAL WITH MX LOGIC® ARCHIVE STORAGE CONTROL

Businesses that require a storage-only solution can turn to MX Logic® Archive Storage Control for management of inbound, outbound and internal emails. This convenient managed service includes:

- One gigabyte of storage per user, per year, with an increase of one gigabyte per user, for each additional year of service
- Advanced search options and fast, accurate information retrieval by authorized persons
- Multiple levels of permissions/authority for employers, compliance officers, corporate officers and legal departments
- Definable retention policies based on regulatory requirements
- Single Instance Storage minimizes storage requirements
- Real-time data as opposed to point-in-time backups
- Storage capabilities for comments and notes
- Flexible options for creating ad hoc reports
- Audit trails provide comprehensive activity logs

CHOOSE FORESIGHT NOT HINDSIGHT

Hindsight may be 20/20 but it's not effective against evolving email threats. To achieve comprehensive protection, MX Logic® Message Archiving can be combined with the MX Logic® Email Defense Service, which filters out spam, viruses, worms and other malicious email messages prior to surveillance and archiving.
